Introduction

Wednesday, September 22, 2021   6:03 PM

- Motivation
    - Model Assessment   vs.   Model Selection
        ↓   ↓
      How good is   How good is my model
      my model?   compared to others?

- Methods
    - Cross-Validation: Best flexibility level of a fitted
                        model via Resampling

    - Bootstrap: Obtaining additional information of a
                 fitted model via Resampling
